ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: POWER SYSTEM

Two-node system with generator, transmission line, transformer and load.

(57) Abstract: The present invention relates to voltage stabilization of electrical power networks, and in particular to a method for voltage stabilization of an electrical power network system comprising a producing power network system side and a consuming power network side to maintain voltage, wherein the power transfer Y_{LD} , wherein Y_{LD} is power load impedance, is dynamically maintained below the loci for maximum power transfer, $n^2 Y_{LD} Z_{LN} = 1$, wherein Y_{LD} is power load impedance, Z_{LN} is transmission line impedance and n is transformer ratio, preferably Y_{LD} is maintained at a stable equilibrium.
